THE GEOGRAPHY OF CIVILISC

25 SUB-GRANTED PROJECTS

5 new established and registered CSOs in the Municipality of Ura Vajgurore, Divjaka, Shijak, Selenica, Devoll

Founder of the "Local Citizens Advisory Commission"

Devoll municipality (Korça region)

"I believe that this is the right moment to implement these kinds of projects, because with the new administrative reform and the implementation of legislation that is ongoing, I think that there is the need for a strong civil society in order for the local government to really be accountable.

One of the biggest challenges currently is making people aware of the important role of civil society and the impact it can have on local government.'

Beneficiary of the sub-granting fund

'There has always been this myth in the Albanian realm that small civil society organizations are constantly ignored by government institutions and used by the bigger organizations in the basis of generating profits. The CIVILISC project achieved to "bust this myth" by firstly increasing the project-writing capacities thus providing great quality and by secondly delivering constant assistance toward these projects' implementation and the community's engagement.'

Deputy Mayor of Selenica Municipality

(Vlora region)

'I greatly value your level of commitment in our municipality as it proved to be very important for the citizens of the region. This turned out to be a very important initiative which managed to build cooperation between LGUs and other actors of civil society.'
